Save Workspace

Workspace Name : [dropdown]   [Create Workspace]

[Provide a name or one will be assigned (WS_DD-MMM-YY_HHMM)]
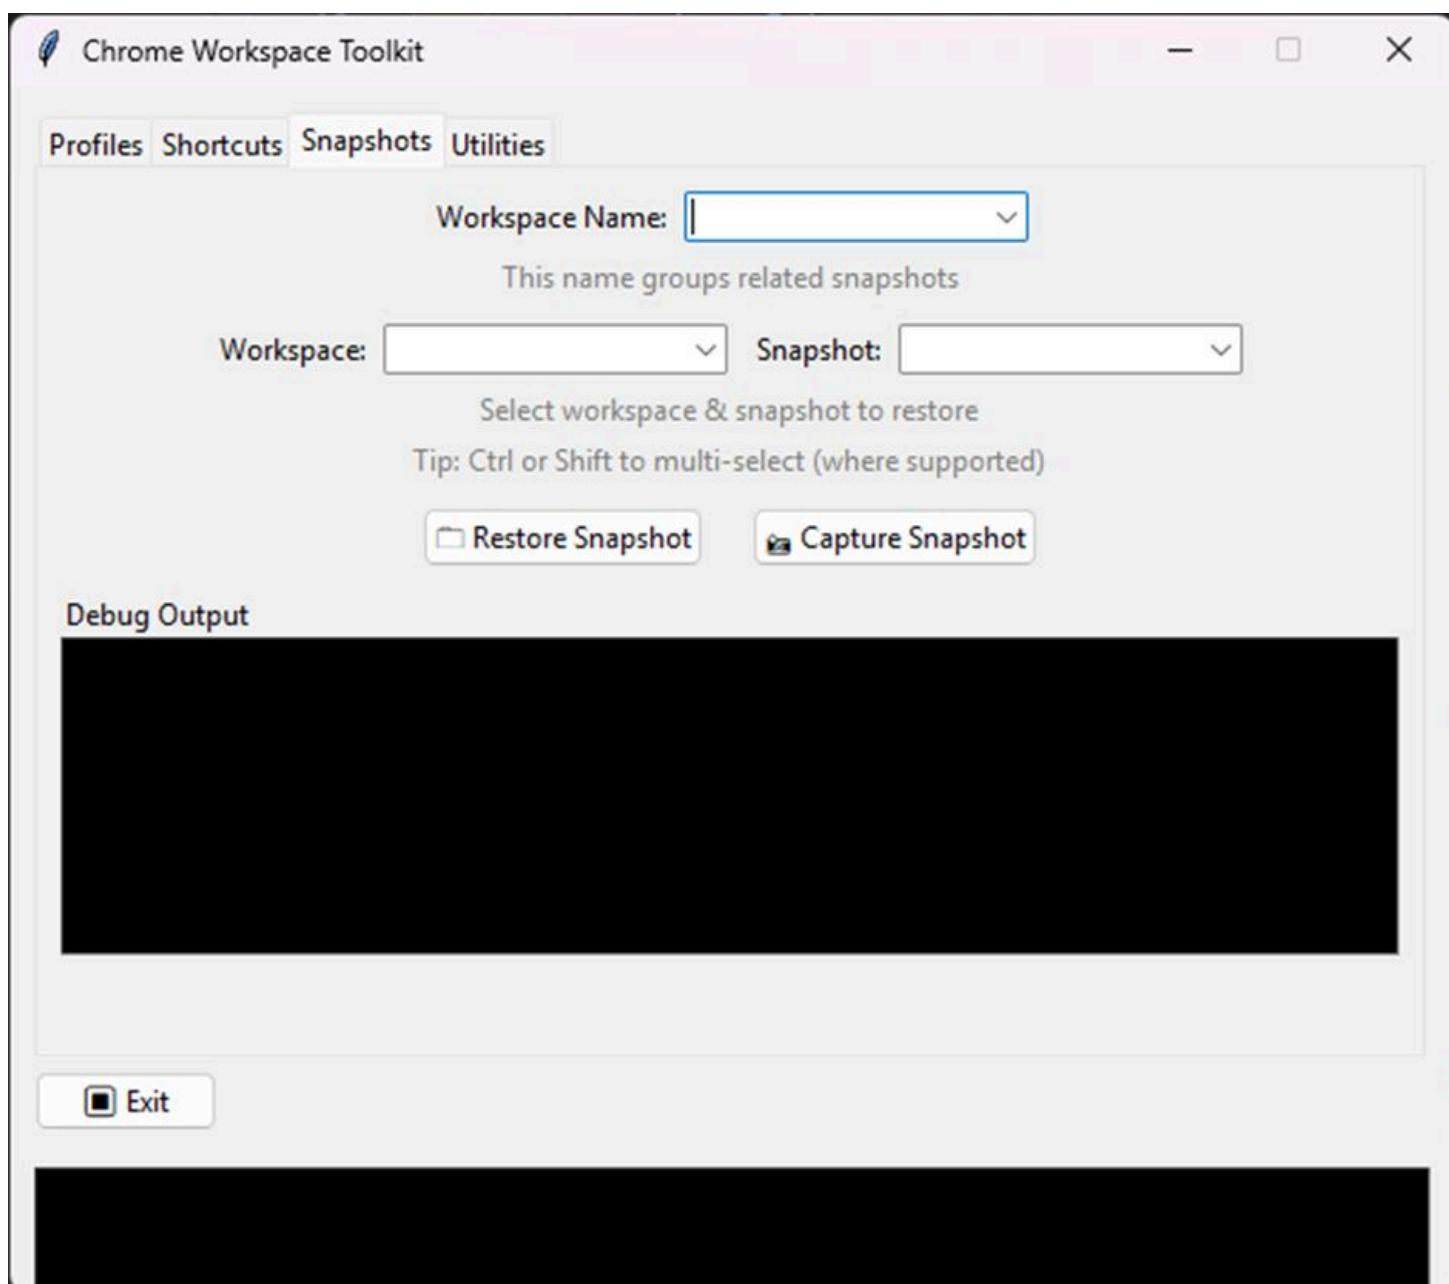

Restore Workspace

Workspace Name : [dropdown]   [Restore Workspace]

[X] Restore Applications

[X] Restore Desktop Schema

[Select a Workspace]

1. We need to implement this functionality. Default should be 'checked
2. Can we actually re-create the Desktop schema complete with appropriate Window names ?' TBD

1. Can we re-start APPs ?
2. Restoration of a WS without restoring APss is equivelant to a SS - only restore, so we will not offer this option from the SS Tab

Save Snapshot Collectation

Collection Name : [dropdown]   [Create Collection]

[Provide a name or one will be assigned (SS_DD-MMM-YY_HHMM)]

Restore Snapshot Collection

Collection Name : [dropdown]   [Restore Collection]

[Select a Collection]

If a particular Window does not find its target Desktop, that Window will not be restored

1. The activity on this Tab seems pretty straightforward
2. Can we scan the Desktops via their Desktop number vs. (assigned) name (Do we do that now or arewe strictly Name - based ??
3. We will restore Windows period. Not certain what happens with apps ....
